Education

Kyungpook National University Daegu, South Korea
B.S., Computer Science & Biomedical Covergence Science and Technology (double major) *Mar 2020 — Feb 2023*
- Cumulative GPA: 3.82/4.3 (94.2/100)
- Dropped out

Korea University Seoul, South Korea
B.S., Biosystems and Biomedical Science & Computer Science (double major) *Mar 2023 — Feb 2026*
- Transferred in junior year
- Cumulative GPA: 4.28/4.5 (97.8/100)
- Major GPA: 4.34/4.5

Projects

Deep Learning from Scratch github.com/seokzoo/deep-learning-from-scratch/
- Implemented deep learning models including DQN, LLaMA, VAE, DDPM, and I-JEPA using PyTorch
  - recent self-supervised model and generative model architectures

nand2tetris github.com/seokzoo/nand2tetris
- Built a simple computer from scratch using HDL as part of the nand2tetris course
  - Designed basic logic gates, ALU, memory units, and CPU

OS in 1000 lines github.com/seokzoo/OS-in-1000-lines
- Building a minimal Operating System in 1k LOC of C
  - OS for RISC-V(32bit) running on OpenSBI

Extracurricular Activities

Hacking

Vulnerability Assessment Volunteer, Kyungpook National University IT Center Jan 2022 — Feb 2022
- Participated in a security vulnerability assessment of the university's next-generation integrated information system as a volunteer
- Reported multiple vulnerabilities including Web Shell, XSS, and others

Vulnerability Assessment for KIBO Dec 2020 — Dec 2020
- Participated in the "KIBO New Website Vulnerability Assessment" project led by IglooSecurity
- KIBO (Korea Technology Finance Corporation) is a quasi-governmental agency under South Korea's Ministry of SMEs and Startups
- Reported multiple vulnerabilities (Detailed information is confidential due to NDA)

Skills

- **Programming Languages**: C/C++, Python, OCaml
- **Technologies**: PyTorch, Git
